Imagine a world in which every single human being can freely share in the sum of all knowledge. That's our commitment.

This is the vision for Wikipedia and the other Wikimedia projects, which volunteers from around the world have been building since 2001. Bringing together the sum of all human knowledge requires the knowledge of many humans — including yours!

What is Wikipedia?

Wikipedia — the free encyclopedia that anyone can edit — is one of the largest collaborative projects in history. With millions of articles and in hundreds of languages, Wikipedia is read by hundreds of millions of people on a regular basis.

A lot of content already exists on Wikipedia, but many important topics have poor coverage and some have no article at all. Wikipedia relies on contributors like you to keep information current, expand short “stub” articles, and create new articles on topics not already covered in your language Wikipedia. Contributions you make to Wikipedia can enlighten hundreds, thousands, or even millions of people worldwide.

When you make an edit to Wikipedia, you’re joining a community of hundreds of thousands of people — Wikipedians — who have freely contributed their knowledge to Wikipedia. What Wikipedians are doing has the potential to change the world. But there’s still a very long way to go before we collect the sum of all knowledge. That’s why we need your help.

What you contribute to Wikipedia is free content and becomes part of the commons. It may be edited and reused by others under a free license.

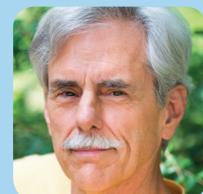

Why edit Wikipedia?

Today, I’m carrying on my grandfather’s life work and his passion for recording local history and heritage. The difference is I have a tool my grandfather did not — Wikipedia.

We want a world that is more open, more educated, and more free. We want a world where knowledge is available to anyone that seeks it.

If what you write is accurate and well written, it will be read by large numbers of people every day. (If not, it will quickly disappear.)

Encyclopedia

From Wikipedia, the free encyclopedia

This article is about the type of reference work.

An [encyclopedia](#) (also spelled [encyclopaedia](#)) is a type of reference work – a compendium holding information from either all branches of knowledge or a single branch of knowledge.^[2] Encyclopedias are divided into entries, which are usually accessed alphabetically. Encyclopedia entries are longer and more detailed than those in dictionaries.^[3] Generally speaking, unlike dictionaries, encyclopedias focus on linguistic information about words, encyclopedias focus on factual information to cover the thing or person the article name stands.^{[4][5][6][7]}

Encyclopedias have existed for around 2,000 years. One of the earliest known encyclopedias, *Naturalis Historia*, was written in ca. AD 77 by the Roman naturalist and physician Pliny the Elder. The modern encyclopedia evolved out of the encyclopedias of the 17th century. Historically, some encyclopedias were published in one volume, but some, such as the *Encyclopædia Britannica*, were published in multiple volumes. Today, most encyclopedias, such as Wikipedia, are electronic.

The word [encyclopedia](#) comes from the Koine Greek word ἐγκυκλία (ἐγκύκλιος), meaning "circular, circular route", derived from the verb [εγκύος](#) (έγκυος), meaning "pregnant". The word refers to the "education": *enkyklios* (ἐγκύκλιος), meaning "circular, circular route", derived from the verb *enkynw* (έγκυνω), meaning "rearing, bringing up". It was reduced to *encyclopedic*, which literally translates as "complete instruction".

Indeed, the purpose of an encyclopedia is to provide a general system to the men with whom we live, so that the preceding centuries will not become useless. Those who are instructed, will at the same time become rich, and will render a service to the human race in their time.

Community

From Wikipedia, the free encyclopedia

For other uses, see [Community \(disambiguation\)](#).

The term **community** has two distinct commutative meanings: 1) a small, social unit of any size that shares common [values](#), [norms](#), [symbolism](#) or [international community](#), and 2) in [biology](#), [organisms](#) sharing a populated [environment](#).

In [human](#) communities, [intent](#), [belief](#), [resources](#), [preferences](#) and [conditions](#) may be present and common, affecting the [ideals](#), [cohesiveness](#) and [internal dynamics](#).

Since the advent of the [Internet](#), the concept of community has changed. People can now gather virtually in an online community and share ideas regardless of location. Prior to the internet, virtual communities (like [newsgroups](#)) were limited by the constraints of available communication and technology.

The word "community" is derived from the [Old French](#) word *communauté* (*commun*, "with/together" + *munus*, "gift"), a broad term for a group of people. Some examples of community service are to help in church, to support local sports teams, to organize neighborhood watch programs, and to work for political candidates.

Why edit Wikipedia?

When I have kids, I want them to know
Nepal's culture and our rich history, and
to learn it in our own language — and
Wikipedia is making that possible.

When I searched on Wikipedia, there
was nothing. So I decided to write the
article myself. To date, more than 18,000
people have read my article. Some have
even added their own information and
sources.

I learned to speak English by fighting
vandalism on Wikipedia.

Preparing to edit

Anyone can edit Wikipedia, but there are some basic rules. Here are some of the most important ones to follow as you start editing:

Neutral point of view

Everything on Wikipedia must be written from a neutral point of view. Articles must not take sides, but instead should describe — accurately and without bias — all the significant viewpoints on the topic published in reliable sources. Argumentation or advocacy does not belong in Wikipedia articles.

No original research

Simply put, Wikipedia is not a place to publish original ideas. Rather, you should summarize what others have published in reliable sources about the topic. Articles may not contain any new analysis, and they should not synthesize published materials to reach broader conclusions beyond what the individual sources say.

Copyright and plagiarism

Since all contributions are freely licensed, no editor owns any article; all of your contributions can and will be edited and redistributed. Except for brief quotations, copying content from copyrighted sources onto Wikipedia is not allowed. Whether direct copying or close paraphrasing, plagiarism and copyright violation are disruptive and time-consuming for volunteers to clean up. It's important that all content you contribute to Wikipedia is written in your own words. (Public domain and freely licensed content may also be added to Wikipedia as long as it is properly attributed.)

Reliable sources

Information in Wikipedia needs to be verifiable, based on reliable published sources. You should include citations for the information you add to the encyclopedia, so that others can check it for themselves. The most reliable sources for Wikipedia are third-party sources with a reputation for fact-checking, such as books published by academic presses, peer-reviewed academic journals, and international newspapers. You should be using sources that represent significant viewpoints, rather than one-off studies or fringe work. Try to find the best and most reliable sources available on the topic.

Conflict of interest

If you have a conflict of interest about a particular topic — such as an employer or an organization you are a part of — you should avoid editing articles about it.

We've developed these policies and principles over the years so we can be sure that Wikipedia is as reliable and useful as possible.

What is encyclopedic style?

Writing in an encyclopedic style and a formal tone is important when adding new content to Wikipedia. Instead of essay-like, argumentative, or opinionated writing, Wikipedia articles should have a straightforward, just-the-facts style. Here are examples of the do's and don'ts of encyclopedic writing.

Inappropriate

Britannica and the Future of Encyclopedias

Encyclopædia Britannica, although a celebrated and historically significant encyclopedia, has little relevance in modern society. Instead, most experts agree that the future of the encyclopedia genre belongs to Wikipedia and other wiki encyclopedias — created by regular folks like you and me. Ironically, while it was a great influence on Jimmy Wales and the intrepid new generation of amateur encyclopedists who created — and continue to create — Wikipedia, *Britannica* in recent years has come to symbolize everything wrong about the old ways of creating and distributing knowledge: top-down control, unaccountable gatekeepers who decide what does and does not merit coverage, copyright restrictions and high prices that limit access to the wealthy, and — in its current online form — intrusive advertising that undercuts the reliability and usability of its content.

What to avoid:

Don't create new essay-like articles or sections.

Don't structure your writing as an argument.

Don't use "weasel words" (like "most experts agree" or "some people say").

Don't use colloquial language or slang.

Don't use "peacock terms" (like "great", "extraordinary", or "intrepid").

Don't inject personal opinion into the writing.

Don't use overly complex language and sentence structure.

Appropriate

Since the early 1990s, the *Britannica* has faced new challenges from digital information sources. In rapidly changing fields such as science, technology, politics, culture, and modern history, the *Britannica* has struggled to stay up-to-date, a problem first analyzed systematically by its former editor Walter Yust. [1] Although the *Britannica* is now available both in multimedia form and over the Internet, its preeminence is being challenged by other online encyclopedias, such as Wikipedia. [2]

Do:

- Use plain language
- Be brief
- Cite sources to back up factual claims
- Attribute viewpoints to the people who hold them
- Avoid stating conclusions, except when attributed to a specific source

Editing with VisualEditor

With VisualEditor, you can see what your changes will look like as you edit, so you can focus on the content. Just click on the parts you want to change and start editing.

Editing toolbar

In edit mode, the toolbar lets you add formatting, references, images, and special page elements called templates (such as the infoboxes at the beginning of many articles). When you are finished editing, press the "Save page" button.

Lead section

The first sentence provides a definition of the topic, and the lead section goes on to summarize the key points covered in the article. This is the only section without a heading.

Images

Freely licensed images and other media files can be added to Wikipedia articles from Wikimedia Commons.

Citations

Inline citations in the body of the article are used to show where the information in each part of the text came from. The citation details appear as footnotes at the end.

Templates

Reusable pieces called templates are used to format information in standard ways, and to insert things like the banners that alert readers to problems with an article.

Body of the article

Headings — and sometimes sub-headings — break the article up into sections, and are used to generate the table of contents. Each section usually covers some significant aspect of the topic, so that readers can jump right to the information they are looking for.

Appendices and footnotes

After the main body of an article come sections with additional information, such as related Wikipedia articles ("See also"), footnotes with details on the sources used ("References"), and a list of other websites readers could turn to for more information ("External links").

Encyclopedia

From Wikipedia, the free encyclopedia

This article is about the type of reference work. For other uses, see *Encyclopedia* (disambiguation).

An **encyclopedia** (also spelled **encyclopaedia** or **encyclopdia**)^[1] is a type of reference work – a compendium holding a summary of information from either all branches of knowledge or a particular branch of knowledge.^[2] Encyclopedias are divided into articles or entries, which are usually accessed alphabetically by article name.^[3] Encyclopedia entries are longer and more detailed than those in most dictionaries.^[3] Generally speaking, unlike dictionary entries, which focus on linguistic information about words, encyclopedias focus on factual information to cover the thing or concept for which the article name stands.^{[4][5][6][7]}

Encyclopedias have existed for around 2,000 years; the oldest still in existence, *Naturals Historia*, was written in ca. AD 77 by *Pliny the Elder*. The modern encyclopedia evolved out of dictionaries around the 17th century. Historically, some encyclopedias were contained in one volume, but some, such as the *Encyclopédie Britannica* or the world's largest *Encyclopédia universalis illustrata europeo-americana*, became huge multi-volume works. Some modern encyclopedias, such as *Wikipedia*, are electronic and are often freely available.

The word *encyclopedia* comes from the Greek ἐγκύκλιος παιδεία [enkyklios paideia], meaning "general education"; *enkyklos* (ἐγκύκλος), meaning "circular, recurrent, required regularly"; *gen-* (γέν-) + *paideia* (παιδία), meaning "education, rearing of a child".^[10] It was reduced to a single word due to an error^[11] by copyists of Latin manuscripts. Together, the phrase literally translates as "complete instruction" or "complete knowledge".

Indeed, the purpose of an encyclopedia is to collect knowledge disseminated around the globe; to set forth its general system to the men with whom we live, and transmit it to those who will come after us, so that the work of preceding centuries will not become useless to the centuries to come; and so that our offspring, becoming better instructed, will at the same time become more virtuous and happy, and that we should not die without having rendered a service to the human race in the future years to come.

Characteristics

This section needs additional citations for verification. Please help improve this article by adding citations to reliable sources. Unsourced material may be challenged and removed. (June 2010)

The modern encyclopedia was developed from the *dictionary* in the 18th century. Historically, both encyclopedias and dictionaries have been researched and written by well-educated, well-informed content experts, but they are significantly different in structure. A dictionary is a linguistic work which primarily focuses on alphabetical listing of words and their definitions. *Synonymous* words and those related by the subject matter are to be found scattered around the dictionary, giving no obvious place for in-depth treatment. Thus, a dictionary typically provides limited *information*, *analysis* or background for the word defined. While it may offer a definition, it may leave the reader lacking in *understanding* the meaning, significance or limitations of a term, and how the term relates to a broader field of knowledge. An encyclopedia is, allegedly, not written in order to convince, although one of its goals is indeed to convince its reader about its own veracity. In the terms of Aristotle's *Modes of persuasion*, a dictionary should persuade the reader through *logos* (conveying only appropriate emotions); it will be expected to have a lack of *pathos* (it should not stir up irrelevant emotions), and to have little *ethos* except that of the dictionary itself.

To address those needs, an encyclopedia article is typically non-linguistic, and covers not a word, but a subject or *discipline*. As well as defining and listing synonymous terms for the topic, the article is able to treat it in more depth and convey the most relevant accumulated knowledge on that subject. An encyclopedia article also often includes many *maps* and *illustrations*, as well as *bibliography* and *statistics*.

Four major elements define an encyclopedia: its subject matter, its scope, its method of organization, and its method of production:

- Encyclopedias can be general, containing articles on topics in every field (the English-language *Encyclopédie Britannica* and German *Brockhaus* are well-known examples). General encyclopedias often contain guides on how to do a variety of things, as well as embedded dictionaries and gazetteers. [citation needed] There are also encyclopedias that cover a wide variety of topics but from a particular cultural, ethnic, or national perspective, such as the *Great Soviet Encyclopedia* or *Encyclopædia Judaica*.

A Image

Double square brackets around the title of a photo from Wikimedia Commons will insert the image. Pipes separate optional parameters to control how the image is displayed. The most common way is with two parameters: the word "thumb" to use the standard thumbnail format, and a descriptive caption that appears beneath the image.

[[File:Example.jpg|thumb|caption]]

B Bold

Three single quotation marks before and after a string of text makes that text bold. The article's subject is usually bolded in the first sentence.

'bold text'

C Citation

Opening and closing ref tags are used to cite a source. An automatically-numbered superscript appears at the location of the ref tags, and the content appears as a footnote in the references section.

<ref> citation text </ref>

D Internal link

Double square brackets around a term create a link to the article of that name. Adding a pipe and another string of text before the closing square brackets changes the link text.

[[article title|text]]

E Italic

Two single quotation marks begin and end a segment of italic text.

'italic text'

F Heading

A pair of double equals signs mark a line as a heading. Triple equals signs make a sub-heading.

G Template

Double braces are used for templates, which are reusable page elements that serve many purposes. The first item after the opening braces is the template's name. Pipes separate the parameters, which are additional inputs that can change the way the template works or what it displays.

H References

The references tag, or an equivalent template, sets the location where the footnotes show up — typically in a "Notes" or "References" section.

A single square bracket, followed by a URL, a space, label text, and a closing square bracket makes a normal hyperlink. Typically, they are only used in footnotes or an "External links" section.

The Penny Cyclopædia of the Society for the Diffusion of Useful Knowledge was a multi-volume encyclopedia edited by George Long and published by Charles Knight alongside the *Penny Magazine*. Twenty-seven volumes and three supplements were published from 1833 to 1843. The unnamed contributors to the *Penny Cyclopædia* included many notable figures of the period, including Henry Ellis, John Kitto, Charles Knight, George Henry Lewes, Augustus De Morgan, James Paget, George Richardson Porter, Thomas Southwood Smith, and Ralph Nicholson Wornum.^[1] Herman Melville is known to have used the *Penny Cyclopædia* while writing *Moby-Dick* and other novels, and scholar Paul McCarthy has suggested that the encyclopedia's coverage of moral insanity and monomania may have influenced Melville's characters in *Moby-Dick* and other writings.^[2]

This image shows what the contributor added and the markup they used. Follow these steps and you too can add content to a Wikipedia article.

Step 1: Pick a topic you want to write more about.

Step 2: Find a reliable source that covers the topic better than the current Wikipedia article.

Step 3: Now comes the fun part. Click the Edit button! **A**

Step 4: Add some of what is missing. Using the source you've found, summarize the information you want to add in your own words. **B**

Step 5: At the end of your new block of text, add a reference. In the edit toolbar — whether you're using wiki markup or the VisualEditor — you can click the 'cite' icon to cite your source. **C**

Step 6: In the 'edit summary' field, add a brief description of what you've done in your edit. **D** (With VisualEditor, you'll be prompted for an edit summary after you click Save page.) The edit summary helps other editors understand what you are doing.

Step 7: Now it's time to save your changes. Be sure to click Save page. **E**

User pages and Talk pages

Wikipedia has other types of pages beyond articles. As you start editing, you might also want to create your [User page](#) to let others get to know you a little bit.

At the top right (if you are logged in) you will see your username, which you can click to reach your User page. Links to pages that do not exist — such as your User page if you have not created it yet — are colored red, instead of the typical blue.

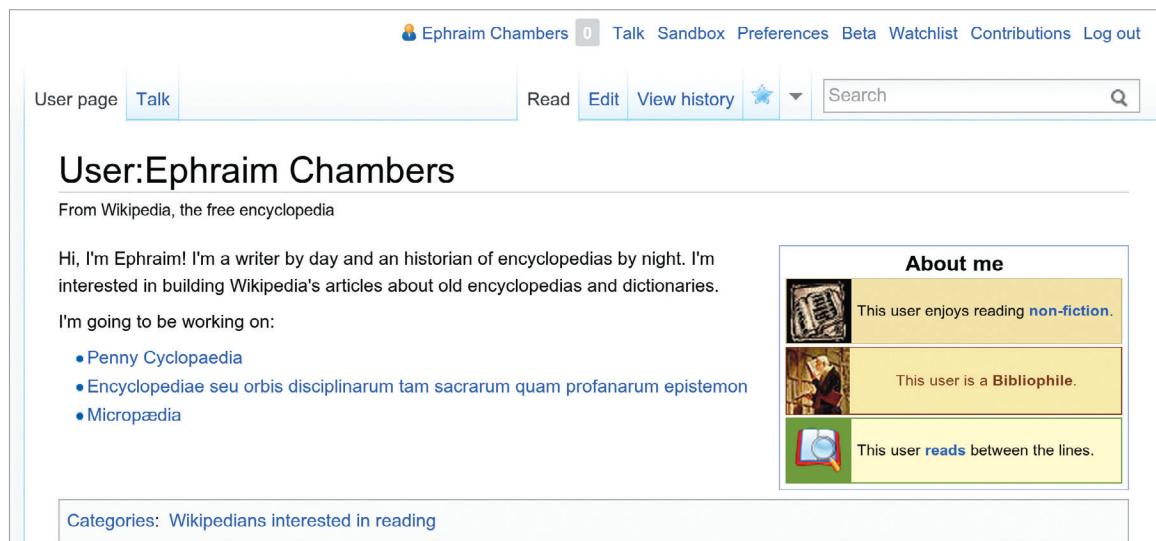

Ephraim Chambers

The screenshot shows the user interface for creating a new user page. The top navigation bar includes links for 'Talk', 'Sandbox', 'Preferences', 'Beta', 'Watchlist', 'Contributions', and 'Log out'. Below the navigation bar, there are tabs for 'User page' (which is red) and 'Talk' (which is blue). A 'Create' button is visible in the toolbar, along with a search bar.

If you click the [Create](#) button on one of these pages, you can start from a blank page. A User page is a place to write a little bit about yourself, to give other contributors an idea of who you are and what you're interested in. You can share as much or as little as you like.

When you [Save](#) the page, your red link will turn blue!

The screenshot shows the User page after saving. The title is now 'User:Ephraim Chambers'. The toolbar includes 'Read', 'Edit', and 'View history' buttons. On the right side, there is a sidebar titled 'About me' with three sections: 'This user enjoys reading non-fiction.' (with a book icon), 'This user is a Bibliophile.' (with a person reading a book icon), and 'This user reads between the lines.' (with a magnifying glass icon).

You also have a [User Talk page](#), where other contributors can leave messages for you. If you want to contact another contributor, you can navigate to their Talk page and leave a message at the bottom.

You should sign your messages on Talk pages; clicking the Signature button in the edit toolbar will insert four tildes (~~~~), the special wiki markup for inserting your username along with the date and time of your message.

Interacting with the community

Every article has its own [Talk page](#), too. These Talk pages can be used to make suggestions, post new sources, point out problems, and discuss changes that contributors disagree about.

The article claims that the Greek word is ΣΥΓΚΛΟΤΑΙΩΣΙΑ It seems to me that it should be ΕΝΚΛΟΤΑΙΩΣΙΑ. ALSO, ΕΝΚΛΟΤΑΙΩΣΙΑ would never mean "general." It means "in a circle." How can this mean "general"? [Lestrade \(talk\)](#) 23:55, 20 April 2011 (UTC) Lestrade

It doesn't mean "well rounded education" either, that would be "eūcyclopedia" [έύκλοπαιδεία]. "v" = "n" and "ù" = "u." [Lestrade \(talk\)](#) 03:13, 22 April 2011 (UTC) Lestrade

a) When the prefix *εν* combines with a word beginning in *κ*, it regularly becomes *εγ*.

b) The original Greek phrase was *εγκύλιος παιδεία*, "encyclical education", the circle of arts and sciences considered by the Greeks as essential to a liberal education" (OED). See the [Liddell and Scott definition III.3.](#) of *εγκύλιος* 'general education, prior to professional studies'. The current writeup is a bit confusing; I will work on it. [Macrakis \(talk\)](#) 18:38, 16 March 2012 (UTC)

Nationalistic bias [\[edit\]](#)

I think this article is affected by a nationalistic bias, particularly in two sentences.

Firstly there was written that sir Browne's work was the first to be titled encyclopedia. This information was evidently incorrect, since Aventinus and Skalić used this title before. Likely, Browne was the first one in English. So I added the words "in English". However, I have no source about that.

Secondly, the article says that Harris was the first one to write an alphabetical encyclopedia. That, too, is incorrect. In fact, it's evident that also Moréri, Furetière and Bayle's works were alphabetical (not to mention Etymologiae or Suida) and theirs, too, like Harris', were specialistic dictionaries more than true encyclopedias. So, also in this case I think that Harris was the first in English.

The reason why I'm so angry about the nationalistic bias in this article is that it's been translated in many other languages, so that these deceitful informations have been spread throughout the wikipedias. [Lele giannoni \(talk\)](#) 10:43, 13 May 2012 (UTC)

Unresolved link [\[edit\]](#)

What makes a scholarly encyclopedia? is broken and now points to the general Duke library website [\[\[5\]\]](#), rather than to <http://www.lib.duke.edu/lilly/artsearch/guides/discussion%20guides/scholarlyencycl.htm> [Robertekraut \(talk\)](#) 20:40, 30 July 2012 (UTC)

A screenshot of a Wikipedia talk page for the article "Talk:Encyclopedia". The page header includes links for "Article", "Talk", "Read", "Edit", "New section", "View history", and "See". A red notification badge with the number "1" is visible in the top right corner. The main content area displays the text "Talk:Encyclopedia" and "From Wikipedia, the free encyclopedia". Below this, there is a yellow banner with a star icon stating: "This article was selected as Today's article for Improvement on July 29, 2013 for a period of week." Another banner below it says: "This is the talk page for discussing improvements to the Encyclopedia article." At the bottom of the page, there are instructions: "This is not a forum for general discussion of the article's subject" and "Be polite, and welcoming to new editors".

Look, a new Notification! 1

These let you know when someone mentions your username, thanks you for an edit, or leaves a message on your User Talk page.

One important guideline for community discussions on Wikipedia is to be respectful and civil. Even if you get into disagreements, you should *assume good faith* on the part of other contributors. They almost always have the same goal you do — to make Wikipedia better. Keep the discussions focused on content, rather than making them about individual contributors.

Mobile editing

In addition to the traditional desktop interface, Wikipedia has a streamlined mobile version that you can use to both read and edit. Just visit Wikipedia on your smartphone or tablet, then log in.

The screenshot shows the Wikipedia mobile application. At the top left is a navigation menu with options: Home, Random, Nearby, Watchlist, Uploads, Settings, and Log out. A tooltip for 'Nearby' indicates it's selected. To the right of the menu is a search bar with the placeholder 'Search Wikipedia'. A red notification badge with the number '1' is visible in the top right corner. The main content area displays the article 'Penny Cyclopaedia'. The title is bolded. Below the title are three edit tools: a pencil icon, a camera icon with a plus sign, and a star icon. The article text describes 'The Penny Cyclopædia of the Society for the Diffusion of Useful Knowledge' as a multi-volume encyclopedia edited by George Long and published by Charles Knight alongside the *Penny Magazine*. It notes that twenty-seven volumes and three supplements were published from 1833 to 1843. A separate paragraph below discusses the unnamed contributors, mentioning Henry Ellis and John. On the left side of the screen, there are five callout boxes with labels: 'Show and hide menu options' (pointing to the menu icon), 'Edit articles' (pointing to the pencil icon), 'Upload and add photos' (pointing to the camera icon), 'Add articles to your watchlist' (pointing to the star icon), and 'Check your Notifications' (pointing to the notification badge).

Why edit Wikipedia?

I love knowing that I'm contributing to something bigger than myself.

On one side, you have a bunch of rich, powerful companies. They want to turn the web into a medium for consumption: interactive television meets shopping mall. On the other side, you have a bunch of people who think the Internet can change the world.

Everybody reads Wikipedia. If they want to learn something, they turn to Wikipedia first. I know I've helped a little — maybe even a lot. And that's the greatest feeling I know.

More about English Wikipedia

Each language version of Wikipedia is different (although there is a lot in common across languages as well). These are some of the things specific to English Wikipedia that you may find useful.

Creating your first article

Starting a new article on English Wikipedia — and making sure it doesn't get deleted — can be tricky. For a detailed guide on creating your first article, see | [shortcut](#) [WP:FIRST](#).

Wikipedia Signpost

The *Signpost* | [shortcut](#) [WP:SIGNPOST](#) is a weekly community newspaper, covering Wikipedia-related news and research, important discussions, new Featured content, and more. You can even *subscribe* to have it delivered to your Talk page each week.

Uploading non-free images

In general, only freely licensed or public domain images can be used to illustrate Wikipedia articles, and these should be uploaded to Wikimedia Commons (commons.wikimedia.org). However, limited exceptions are allowed on English Wikipedia under the non-free content rules | [shortcut](#) [WP:NONFREE](#) for things like album covers. Non-free images uploaded to Wikipedia without a clear justification under the rules will be deleted.

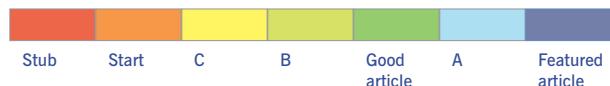

WikiProjects

WikiProjects are groups of contributors who have a common interest when it comes to editing Wikipedia. Browsing the existing WikiProjects | [shortcut](#) [WP:WIKIPROJECT](#) and joining ones that interest you can be a good way to find things you want to work on and connect with other Wikipedians.

WikiProjects Directory

Wikipedia 1.0 assessments

WikiProjects on English Wikipedia have a system for rating the quality and importance of articles, known as the Wikipedia 1.0 assessments | [shortcut](#) [WP:ASSESS](#). For quality, these ratings go from Stub (just the beginnings of an article) to Start to C-class to B-class, and then the formally reviewed ratings of Good article, A-class, and Featured article.

You can see the ratings for an article at the top of its Talk page, and most WikiProjects maintain a table showing how many articles related to that WikiProject have each rating. Browsing WikiProjects for Stub and Start articles is a good way to find new topics to work on.

Evaluating Wikipedia article quality

The quality of Wikipedia articles varies widely; many are very good, but some lack depth and clarity, contain bias, or are out of date. In general, high-quality articles have these elements:

- a lead section that gives an easy-to-understand overview,
- a clear structure,
- balanced coverage,
- neutral content, and
- reliable sources.

Additional information about article quality is available by consulting the “Evaluating Wikipedia” brochure (see below).
